

DataStax Enterprise Migration Assessment Program

Data Sheet

The DataStax Enterprise Migration Assessment Program is designed to move you to a fully supported version of DataStax software with the latest features and functions available for your use.

DataStax Enterprise Migration assessments are provided **free of charge** to ensure that you receive the maximum benefit from your DataStax subscription.

The migration assessment program will provide you with the following:

- Customized evaluation of your existing Cassandra or legacy DSE environment
- Risk mitigation strategy specific to your implementation
- List of recommended steps to plan, initiate and complete your migration to the desired DataStax Enterprise version

In most cases, the assessment can be completed remotely by one of our expert architects with very little time required from your team.

Don't be left unsupported!

Please email us today at customer@datastax.com to schedule your migration assessment.

DataStax reserves the right to change or terminate the Enterprise Migration Assessment Program, in its entirety or any part thereof, without notice to customers
