

DataStax Architecture Review Accelerator Services Package

Data Sheet

Overview

The **DataStax Architecture Review Accelerator Services Package** is designed to jumpstart a client's preparation for application launch on the DataStax platform. This services package provides focused architectural design services to shorten customers' path of self sufficiency with the DataStax software platform.

Approach

DataStax Services works closely with customers throughout the engagement providing expertise in key aspects of architecture design, assisting with the following core activities:

- Hardware Design Review
- Network Design Review
- Security Design Review
- Application Code Review

Benefits

DataStax Services will share best practices honed over hundreds of similar customer engagements. This package is designed to increase your speed and stability with a production application on the DataStax software platform. The DataStax Architecture Review Accelerator Services Package provides the following benefits:

- **Align Hardware to Performance Needs** – During Hardware Design Review, the DataStax consultant works with customers to review and develop recommendations regarding the hardware design based upon anticipated performance needs.
- **Reduce Potential Latency Issues** – During Network Design Review, the DataStax consultant reviews the proposed network design to provide recommendations to decrease any potential latency or other network performance concerns.
- **Confirm Security Configuration** – During Security Design Review, the DataStax consultant reviews the security requirements of the application and provides recommendations that correspond to security configuration changes in the DataStax platform.
- **Ensure Application Code Meets System's Needs** – During Application Code Review, DataStax Services will review your proposed application code to provide recommendations to meet required performance and/or stability needs of the overall system.

For more information, please contact your account executive or send an email to customercare@datastax.com.
