

DataStax Max Accelerator Services Package

Data Sheet

Overview

DataStax Max Accelerator Services Package is designed to jumpstart a customer's implementation of the DataStax Max Platform with all the support and tools needed to accelerate the path toward self-sufficiency with their DataStax software.

Approach

DataStax Services works closely with a customer throughout the engagement, providing expertise in key aspects of a successful application deployment on the DataStax Max Platform. With the Max Accelerator Services Package, DataStax Services will assist with the following core activities:

- Development Environment Setup
- Architecture Design
- Cassandra Core Concepts Training
- DSE Spark OR DSE Search Training

Benefits

DataStax Services will share best practices honed over hundreds of similar customer engagements. This package is designed to increase customers' speed and stability with a production application on the DataStax Max Platform. The DataStax Max Accelerator Services Package provides the following benefits:

- **Align Development Environment** – During Development Environment Setup, DataStax Services will help establish a development environment that aligns with how the DataStax technology interacts with the supported application.
- **Ensure Load Volumes and SLAs can be met** – During Architecture Design Review, DataStax Services will review the proposed application architecture based on the customer's anticipated load volumes and required service level agreements.
- **Ensure Baseline Technical Expertise** – Our Cassandra Core Concepts Training provides customers with a solid baseline of technical expertise.
- **Ensure DSE Spark/DSE Search Proficiency** – We will conduct a training session for customers focused on either the DSE Spark or DSE Search functionality.

For more information, please contact your account executive or send an email to customercare@datastax.com.
